

Rashik Ghosh

Email: rashikghosh2004@gmail.com
Linkedin: [linkedin.com/in/rashik-ghosh12](https://www.linkedin.com/in/rashik-ghosh12)

GitHub: github.com/Rashik2004
Mobile: +91 94303 57319

SKILLS

Languages: Java, C++, Python, JavaScript, C, PHP
Frameworks: HTML and CSS, Bootstrap, NodeJS, React, Node.js, JQuery, Tailwind, Express.js
Tools/Platforms: MySQL, MongoDB
Soft Skills: Problem-Solving Skills, Adaptability, Project Management, Leadership

PROJECTS

Social Network Simulator | [GitHub](#) | [Live](#) June 2025 – July 2025

- Architected a full-stack distributed system leveraging Graph Theory (BFS, Union-Find) to model complex data relationships and network connectivity.
- Constructed a RESTful API utilizing Node.js and Express, incorporating JWT (JSON Web Tokens), bcrypt password-hashing, and middleware for rate limiting to ensure robust security.
- Engineered an interactive SVG visualization layer on the frontend, enabling real-time rendering of Adjacency Lists and bidirectional connections.
- Optimized community detection using Disjoint Set Union (DSU) with path compression, facilitating 2nd-degree connection analysis for automated recommendation engines.
- Tech Stack:** HTML5, CSS3, JavaScript, C++, Node.js, Express.js, Git

Question Generation Web-Application | [GitHub](#) | [Live](#) January 2025 – March 2025

- Built an automated SaaS-style platform for academic assessment, integrating Bloom's Taxonomy and algorithmic constraint satisfaction to generate dynamic exam papers.
- Structured a relational MySQL database with B-tree indexing and foreign key constraints to maintain high referential integrity and query performance.
- Integrated a React.js frontend with Styled-Components, featuring asynchronous state management and real-time DOM updates for paper previews.
- Tech Stack:** React.js, JavaScript (ES6+), MySQL, Node.js, REST APIs, UI/UX Design.

Resume Analyser | [GitHub](#) | [Live](#) September 2024 – December 2024

- Developed an AI-powered resume analyzer evaluating ATS compatibility with automated scoring (0-100), identifying formatting issues, missing keywords, and content gaps while delivering categorized improvement recommendations with priority levels.
- Deployed Natural Language Processing (NLP) techniques for keyword extraction, entity recognition, and identifying content gaps within professional datasets.
- Implemented multi-dimensional scoring dashboard with Recharts visualizations for component breakdowns (format, keywords, content, structure), ATS pass likelihood calculations, and real-time optimization feedback with instant file processing.
- Tech Stack:** React.js, TypeScript, Vite, Tailwind CSS, shadcn-ui, Zod, Recharts

TRAINING

Summer Training in Java | Data Structure and Algorithm | [Certificate](#) June 2025 – July 2025

- Completed an intensive Java-based program mastering data structures and algorithm and solving 50+ LeetCode problems.
- Forged three minor and one major project, including a Social Network Analysis platform integrating a high-performance C++ graph engine with a Node.js web interface.
- Codified advanced connectivity logic using Union-Find and BFS/DFS to detect communities and provide real-time friend suggestions within complex data sets.

CERTIFICATES

- | | |
|---|----------------|
| Introduction to Generative AI Studio — Simplilearn | September 2025 |
| Build a Full Website using WordPress — Coursera | May 2025 |
| Introduction to Hardware and Operating Systems — Coursera | September 2024 |
| Databases and SQL for Data Science with Python — Coursera | April 2024 |

ACHIEVEMENTS

- Solved more than 150 questions on LeetCode.
- Achieved 5-star rating in Python on HackerRank.

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology (B.Tech) – Computer Science and Engineering	August 2023 - Present
TPS DAV Public School	Baharagora, Jharkhand
Intermediate	April 2021 – March 2022
TPS DAV Public School	Baharagora, Jharkhand
Matriculation	April 2019 – March 2020
